- Sheet Thickness : 0,40 – 0,50 – 0,60 mm
- Length Options : 4, 5, 6, 7, 8 linear meter
- Insulation Core : Polyurethane
- Insulation Thickness : 15 mm
- Inner Sheet : Polyethylene Film or optional Aluminum Foil
- Place of Production: Teknopanel İzmir Factory

Application Areas

Having a sense of production that keeps up with the today's technology, we produce single sheet panels for roof and wall installation. We appeal to several industries with each of the single sheet panels we manufacture as well strive for giving our best and truest to protect the effort of each one of all.

- Agricultural buildings
- Husbandry buildings
- Industrial buildings
- Commercial buildings
- Residential buildings

Advantages

The single sheet panel of Teknopanel, Isotrapez is used for the roof and wall cladding of the buildings. Isotrapez, with its 9 ribs profiled outer sheet and polyurethane core inner sheet, is a version of traditional trapezoidal with better thermal insulation and acoustic performance as well as humidity resistance and load-carrying feature. The most important feature of it is that it ensures waterproofing even in low-slopes through the exclusive side-lap design. Manufactured in required colors and sizes, Isotrapez provides aesthetics and budget friendly solutions for your buildings.

- Special Side Overlapping
- Better Thermal Insulation
- Better Acoustic Performance
- Reduction of Condensation
- Better Resistance to Walking
